

SHIVA BOMMERA

AI/ML Engineer | Full Stack Developer
Open Source Contributor

+91 9390653053
shivabommerra1436@gmail.com
Hyderabad, Telanagana, India

SUMMARY

Computer Science Engineering (AI & ML) student with hands-on experience in full-stack development, machine learning, and AI-driven applications. Built projects including AI agents, ML analytics systems, IoT research solutions, and CodePeek API, an open-source developer tool. Skilled in Python, React, SQL, FastAPI, and data-driven application development.

EDUCATION

Vardhaman College Of Engineering

Bachelor's Degree in Computer Science Engineering (AI&ML) 2025-2028

Brilliant Group of Technical Institutions

Diploma in Computer Science Engineering 2022 - 2025

SKILLS

- React.js, HTML, CSS, Tailwind CSS
- Python, FastAPI & REST API Development
- SQL & PostgreSQL
- Machine Learning, EDA & Data Analysis
- Scikit-learn, Pandas, NumPy & Matplotlib
- Git & GitHub
- Open Source Development (CodePeek API)
- Problem Solving, Analytical Thinking & Communication Skills

ACHIEVEMENTS

- Presented research work on Affordable Detection of Microplastics in Water Using Optical Light Scattering at the ICECMPA-26 International Conference.
- Secured TG ECET 2025 Rank 532 among 20,000+ candidates.
- Graduated Diploma in Computer Science Engineering with Distinction (92%).
- Solved 250+ DSA problems across LeetCode and coding platforms.

PROFESSIONAL EXPERIENCE

Artificial Intelligence Specialist

Outlier (Freelance) | DEC 2024- JULY 2025

Worked on AI evaluation and response review tasks involving Python-related prompts and outputs, focusing on correctness, clarity, instruction-following, and analytical evaluation of AI-generated responses.

Artificial Intelligence Trainee

Pixel Quest (Hyderabad) | NOV 2024 - MAY 2025

Completed industrial training focused on AI/ML fundamentals, Python-based problem solving, data preprocessing, and machine learning workflows, building a strong foundation in applied AI concepts.

PROJECTS

CodePeek API

- Developed and open-sourced a unified REST API that aggregates coding profile data from platforms including LeetCode, CodeChef, Codeforces, GeeksforGeeks, HackerRank, and GitHub.
- Built using Python and FastAPI with REST-based architecture and deployed on Vercel.

Escanova AI Support Agent

- Built a Salesforce-based AI support ticket escalation system to automate complaint classification, case creation, and priority-based workflows.
- Implemented workflow automation features including escalation routing, notifications, and intelligent support handling.

Microplastics Detection System

- Developed a low-cost Arduino-based system to detect microplastics in water using optical light scattering techniques.
- Presented the research project at the ICECMPA-26 International Conference.

Zara Data Analysis

- Analyzed Zara product and sales datasets using Python and Power BI to identify pricing, promotion, and customer behavior insights.
- Created visual reports and performed exploratory data analysis to communicate business trends effectively.
